

EKU

FACTORY

EKU IN NUMBERS

Every solution that the world automotive industry needs in the OEM and spare parts industries are provided in our factory, with modern technology and 60 years of experience.

60 Years of Manufacturing Experience

Started as a brake drum manufacturer for the world's leading companies in 1962, today we lead our industry as one of the largest foundries in Europe.

150,000 Tons of Melting Capacity

With our experienced engineers, production facility enhanced with modern technologies and 60 years of experience, we strive for excellent results.

7 Continents, **70** Countries

EKU products are being used safely in every continent of the world, including Europe for more than 35 years and North America for more than 20 years.

30,000+ Product Range

We are the solution partner that the automotive industry needs with our wide product range.

Production Capacity of 2 Million Units

Our fully automated Machining Facility is one of the largest processing facilities in Europe with a production capacity of 2 million units.

EKU'S STORY

PROGRESS, CONSISTENCY AND RELIABILITY

Our journey started in 1962 in Karabuk as the first brake drum manufacturer in Turkey. For more than 60 years, we have never stopped producing, learning and developing. Rising with our indispensable values, EKU has managed to become one of the largest production centers in Europe today.

We Care About Innovation

We are aware that we need to bring innovation to our production in order to deliver end-to-end excellence to our customers spanning all continents of the world. As innovation requires, we've moved one step ahead in our field by switching our factory to a fully automated system. Thus, we brought up the entire production process to an efficient, effective, clean and high quality working level.

We Progress With R&D Investments

We are aware that different geographies require different solutions. For this reason, we prioritize our R&D investments and improve our capabilities in the automotive and iron & steel industries. Having a high level of experience in all our work, our products become the first preference by the whole world.

Our Mission is Export

Today, we continue our mission of exporting to Europe for more than 35 years and to America for more than 20 years. We have created a perfect transportation process by using our logistics experience in order to deliver our products all over the world punctually and without any errors. We continue to improve our service quality by making the best of our geographical advantage.

We Don't Compromise Our Values

We value our employees' health and environment since day one. Thus, we have heavily invested in our waste management systems to improve ourselves in every area. We also collect and recycle our waste to minimize our environmental impact.

Our Job is Beyond Definition

We are aware that our job is not merely production. Our job as EKV is to understand the needs of the automotive industry and to support, produce and develop solutions.

OUR VALUES

OUR VALUES ARE
THE POWER
TO CARRY
US TO THE FUTURE

At EKV, each product is manufactured suitably for people, nature and business ethics. In all our activities, steps are taken by considering not only today's world but also the world of tomorrow. The secret to EKV's quality lies under our 60-year-old values that have carried us into the present.

For Our Customers

We communicate with our customers focusing on solutions and customer satisfaction to grow together.

For Quality

We always aim for the better and newer by going beyond our quality standards.

For Our Employees

We work together with our employees for a constantly growing and developing organization.

For Our Suppliers

We provide top quality products and services from our suppliers.

For the Environment

We start every day with the awareness of our responsibility towards the environment.

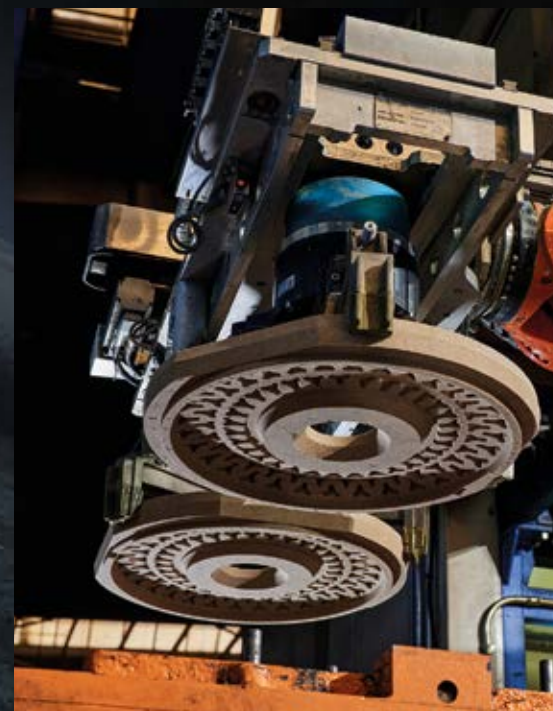

For Efficiency

We ensure efficiency by using resources in the most effective and innovative way.

For Our Country

We create workforce and employment for our national economy.

FOUNDRY

ONE OF EUROPE'S LARGEST FOUNDRIES

We are proud to manufacture the products needed by the automotive industry for heavy and medium commercial vehicles in one of the largest foundries in Europe with a melting capacity of 150,000 tons. Our foundry, which was developed with a modern and environmentalist perspective, is managed by fully automated systems and our team of experienced engineers.

MACHINING FACILITY

LEADING THE FIELD WITH AUTOMATION TECHNOLOGY

EKU machining facility, where automation investments are at the highest level, stands out as one of the largest facilities in the world in its field with a production capacity of 2 million units. Every cast part coming out of our foundry is processed in our machining facility equipped with the latest technology.

R&D AND ENGINEERING

LAB

**WE SAFELY
ADVANCE
IN THE LIGHT OF
SCIENCE**

Our quality, certified by the world's leading organizations, makes EKU a leading manufacturer preferred all over the world. Our fully automatic measurement systems and R&D investments serve our "no compromise on quality" policy. Our experienced engineers analyze all the needs of the automotive industry and deliver the most accurate solutions.

PRODUCT GROUPS

WIDE RANGE OF PRODUCTS

We offer modern, reliable and eco-friendly solutions to the needs of the world automotive industry. We work to produce the best for our customers in different geographies around the world.

Brake Group

Manufactured with the latest technology for high performance.

Transmission Group

Developed for reliability and efficiency.

Air Brake Grubu

Designed in order not to compromise high durability.

Engine Group

Developed for endurance and strength.

Trailer Group

Developed with the highest level of R&D investments.

Sensor Group

Designed for perfect electronic solutions.

In the business world, there are suppliers, and then there are partners.

As EKU, we would like to be your business partner.

A partner that maintains the best quality with the latest technology.

A partner who understands your expectations by acting on the on-time principle.

A partner who is aware of the world's needs and strives for them.

A partner that cares for the environment by working with low energy consumption and emissions.

A partner who has managed to become partners with their employees as well.

All ideas are equal and valuable here.

Welcome to EKU.
